Approval for Solution is for Project: Product Purchase Prediction

TO WHOM IT MAY CONCERN,

We are officially giving approval for Ranindu Wathsal and his team to work with one of our client's dataset for the purpose of creating a product purchase prediction model

The dataset provided will be from one of Sri Lanka's largest F&B Chain, and will be encrypted / distorted in a manner that actual insights are not disclosed to the students. However the dataset structures will remain the same.

Once the analysis is done by the students, we will decipher their insights and prediction models with the actual data and will be implemented at our client's outlets.

BladeGen Tech is the official data analytics and AI Partner for Sri Lanka's largest brands. Such as Barista, SLIIT, Sarasavi, JAT Holdings, CBL and various government organizations.

If you require any further information, please feel free to contact me.

Warm regards,

A handwritten signature in black ink, appearing to read "Kusan".
